

What's going on with Egypt's solar project?

Work is underway on a 1.1 GW solar project with 100 MW/200 MWh of accompanying battery energy storage in Egypt. The first phase of the project is scheduled for commercial operation during the first half of next year.

When will Egypt's first hybrid solar project start?

The first phase of the project is scheduled for commercial operation during the first half of next year. Norwegian renewables developer Scatec has broken ground on its 1.1 GW solar and 100 MW/200 MWh battery energy storage project in Egypt. The project, billed as Egypt's first hybrid solar and battery project, will be built in two phases.

How many MW of solar will be built in 2026?

The first will see 561 MW of solar constructed alongside 100 MW/200 MWh of battery storage, with a targeted date for commercial operation in the first half of next year. The second half of the project, comprising a further 564 MW of solar, is scheduled for completion during the second half of 2026.

When will Scatec start building a solar & Bess hybrid project?

Scatec has signed a mandate letter with several development financing institutions for concessional financing and expects to reach financial close with the lenders and start construction of the solar and BESS hybrid project in the first half of 2025.

Did Scatec enter the PPA with Egyptian electricity transmission company?

We are pleased to have entered the PPA with Egyptian Electricity Transmission Company. We will now finalise land lease agreements, grid connection agreements, and financing, and prepare for construction of the project," says Scatec CEO Terje Pilskog.

CAIRO - 29 May 2025: Construction of the 500-megawatt Kom Ombo solar power plant project in Egypt has been completed, Chinese Ambassador to Cairo Liao Liqiang announced Thursday. ...

Mar 2, 2021 · Project Objectives The Project will increase Egypt's installed power generation capacity from renewable sources, thereby reducing greenhouse gas emissions. It will lead to ...
