

Haiti Telecom Operator Base Station Maintenance

Should etc be a telecommunication operator?

With the merit of ETC as the actual operator of the sector,ETC can and should reflect current technological change,including development of information and communication technology. For the expansion and improvement of curriculum,dispatching the training staff to foreign telecommunication post-grade courses has to be encouraged.

Should etc be the best telecommunication service provider?

Also,customers can contract-out maintenance services to some companies at the responsibility of themselves. The release of these services to private sector will also promote development of telecommunication industries. ETC,of course,can be best provider if they win the competition.

What is a mobile-phone service department (semi-autonomy)?

The mobile-phone service department (semi-autonomy) will be separated from ETC's main body, and will be responsible for the marketing/customer services and the maintenance/operation of the mobile-phone service network.

How ETA can help the telecommunication sector?

ETA should, through the educational ministry or directly, collaborate with these institutes to establish or to expand the courses or subjects on telecommunication for the development of the sector. ETA should also to help the institutes to improve curriculum by feeding back the requirements of the sector.

Should telecom infrastructure development departments encourage outsourcing?

In the long term according to development of local industries related to the sector,the Telecom Infrastructure Development Departments,as well as Financial and Material Resource Department,should encourage outsourcingand to change organization and staff allocation accordingly. Duties of
