

What are supercapacitors & EDLC?

Supercapacitors, also known as ultracapacitors and electric double layer capacitors (EDLC), are capacitors with capacitance values greater than any other capacitor type available today. Supercapacitors are breakthrough energy storage and delivery devices that offer millions of times more capacitance than traditional capacitors.

Are Rs supercapacitors a good brand?

RS offer an extensive range of high-quality double layer supercapacitors from leading brands including Vishay, KEMET, Panasonic, and of course RS PRO. Supercapacitors are categorised based on the design of the electrodes. Electric double layer capacitors have carbon electrodes with a much higher static capacitance than others.

How are supercapacitors categorised?

Supercapacitors are categorised based on the design of the electrodes. Electric double layer capacitors have carbon electrodes with a much higher static capacitance than others. Capacitance measures a component's ability to collect and store energy in the form of an electrical charge. It's measured in Farads (F).

Where can I buy a capacitor?

At Farnell, we provide an extensive selection of capacitors that cater to both basic and complex electronic applications. AEC-Q200 Wide frequency band, high inductance, for power line. Buy Capacitors. Farnell's Ireland offers fast quotes, same day dispatch, fast delivery, wide inventory, datasheets & technical support.

What makes supercapacitors different from other capacitors?

What makes supercapacitors different from other capacitor types are the electrodes used in these capacitors. Supercapacitors are based on a carbon technology. The carbon technology used in these capacitors creates a very large surface area with an extremely small separation distance.

What are Cornell Dubilier supercapacitor products?

Cornell Dubilier supercapacitor products are offered in a full range of capacitance values and configurations. This enables utilization of supercapacitors in a variety of industries and applications for many power requirement needs.
