

# Is outdoor power supply restricted in Sao Paulo Brazil

How secure is Brazil's electricity supply?

According to the ONS, Brazil's electricity supply is secure in the short term, with no risks of blackouts or rationing due to a lack of generation. The operator added that there are also no systemic risks in electricity delivery. However, the same cannot be said for the long-term outlook.

What happened in Sao Paulo during a power outage?

The outage initially affected around 2.1 million households in Sao Paulo's metropolitan area and at least seven people were killed statewide. It prompted some protesters to take to the streets and denounce insufficient action by local authorities as well as alleged neglect by the company.

Will Brazil get power again after heavy rains?

Almost one year ago, Brazil's most populous state had several cities without power after heavy rains, some for as long as six days. CEO Guilherme Alencastre on Sunday declined to provide a timeline for all households to have electricity again. He claimed the company was bringing in extra workers to help restore service.

Will Brazil's border substations experience 'normal' or 'inadmissible' overload in 2029?

Brazil's national grid operator has identified that by 2029, nearly 140 border substations--connecting distribution networks to transmission lines--will experience reverse flow risks of "normal," "admissible," or "inadmissible" overload. "Normal" overload occurs within the technical limits of transformers.

Will Enel restore service in Sao Paulo?

SAO PAULO (AP) -- Brazil's federal government on Monday established a three-day deadline for power distributor Enel to restore service to more than 400,000 households in Sao Paulo's metropolitan area who remain in the dark, energy minister Alexandre Silveira said in a news conference.

Did Boulos opportunism lead to a power outage?

Boulos has seized upon the power outage as ammunition against Nunes, who in turn has accused Boulos of opportunism. Silveira told reporters that more than 50% of the incidents leading to local power outages "were caused by trees falling on medium and low (voltage) systems." City Hall is responsible for trimming trees.
