Molded Case Circuit Breakers (MCCB) protect circuits between 16 amps to 3200 amps and are typically used as the main breaker in a switchboard or to power large equipment directly. Ideal for buildings or manufacturing sites where a higher demand for low voltage power is required.

When do circuit breakers automatically disconnect power?

Circuit breakers also known as electric breakers automatically disconnect power when a short circuit fault is detected downstream or when the circuit becomes overloaded, exceeding the electrical cable current capacity.

What is the voltage range of a circuit breaker?

The range covers ratings from 800 to 6300 A in two different sizes. Circuit breakers automatically disconnect power when a short circuit fault is detected downstream or when the circuit becomes overloaded, exceeding the electrical cable current capacity.

What is a miniature circuit breaker (MCB)?

Miniature Circuit Breakers (MCB) protect circuits up to 125 amps and are used in the final distribution board for homes, offices, shops. They're also used in larger switchboards where MCCBs or even ACBs are used.
