

What is a 3 inch 900 watt solar water pump?

This 3 inch 900 watt solar-powered water pump is an environmentally friendly and energy-saving solution designed to use the electricity generated by solar panels to move water. It adopts advanced solar integration design to ensure efficient energy conversion and reduce dependence on traditional power sources.

What is a 3 hp solar water pump?

On grid 3 HP solar water pump is a grid tied water pumping system. In this system, the solar pump can be powered by direct solar energy as well as the government grid. If the solar panels generate more energy than the 3 HP solar pump's consumption, the excess power is exported to the grid via net metering.

What is a solar-powered water pump?

As a trusted solar-powered water pump factory, we provide flexible OEM/ODM services, fast delivery, and professional technical support to our distribution partners. This 3 inch 900 watt solar-powered water pump is an environmentally friendly and energy-saving solution designed to use the electricity generated by solar panels to move water.

What is a solar water pumping system?

A solar water pumping system consists of a PV array, a motor, and a bore pump. Solar water pumping arrays can have permanent mounts, or installers may place them on passive trackers to increase pumping time and volume. Both AC and DC motors with centrifugal or displacement pumps are used in these circumstances.

Why should you buy a 3 hp solar water pump in India?

With MNRE, the government of India provided a subsidy of up to 90% on the solar water pump. 3 HP Solar water pumps are very useful in places where the supply of electricity is not constant. They can also be used to irrigate the fields, or for the purpose of running a pool filter.

What is a submersible solar water pump?

There are two types of submersible solar water pump. An AC submersible solar pump runs on alternating current (AC) which means a solar inverter is needed to convert the DC (direct current) generated by the solar panels into alternating current (AC). Have a look below to see the specifications of this solar pump. 25000 - 60000 Liters/day.
